in NVIATS service area*

Exciting course offering! Are you interested in a rewarding career in the environment? Train to become a Land Guardian and Environmental Monitoring Technician all in one program! This dynamic program includes in-person training in your communities. Register today!

Land Guardian Program Course Description:

NRTG's Land Guardian Program (LGP) is designed to meet the increasing demand for skilled guardians employed within communities, industry, non-profit organizations, or regional stakeholder groups. Graduates of this program can perform guardian roles and observing, recording, and reporting results, information, and advice to industry stakeholders, government and regulators. Participants learn practical skills and abilities in four core skill areas:

Safety and Fieldwork Logistics:

- Field safety, planning, data collection and management, navigation and orienteering, mensuration and reporting.

Environmental Monitoring:

- Construction site monitoring, spill response, erosion and sediment control, working with legislation, identification, protection and management of sensitive habitats & species.

Identification & Assessment of Environmental Features:

- Basic identification of significant fish, wildlife & vegetation species; introduction to species-at-risk, and rangeland, marine, riparian, and sensitive habitats.

Management:

- Technical writing, business correspondence, fish & wildlife management, project management and supervision.

“This is an amazing course! It has given me so many new field tools that will better help me carry out my work duties as a land guardian.”

Omineca Jack
Land Guardian
British Columbia

Environmental Field Skills Program

Course Description:

The Environmental Field Skills Program (EFS) is a leading -edge field based Environmental Monitoring skills training certificate program. The 120-hour EFS provides course participants with high-quality, in-demand Environmental Monitoring field skills, including the industry standard Backpack **Electrofishing Certification**.

EFS 'graduates' are qualified and capable to lead or assist with environmental monitoring and assessment of mining, hydro-electric, oil & gas, forestry, road construction, and other natural resource-related programs and projects.

Course Format:

The Land Guardian Program & Environmental Field Skills programs are delivered over a combined 7 consecutive weeks instruction. Both programs include extensive 'hands on' training, delivered in realistic field conditions.
